EDUCATION

Providence College of Engineering

Chengannur, Kerala

B.Tech in Computer Science & Engineering with Artificial Intelligence

Expected June 2027

- CGPA: 7.33 / 10
- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Machine Learning, Database Management Systems, Deep Learning, Computer Networks

EXPERIENCE

Space Technology Intern

June 2025 – July 2025

India Space Lab

Remote

- Analyzed CubeSat and CanSat system architecture for a 3U mission simulation; documented subsystem interfaces and sensor payload configurations
- Processed and visualized NOAA satellite telemetry samples using Python to extract meaningful orbital data patterns
- Studied remote sensing pipelines and applied fundamentals to interpret multispectral satellite imagery datasets
- Participated in technical sessions on AI applications in aerospace and space systems innovation

Growth & User Engagement Intern (Self-Initiated)

Jan 2025 – Present

Bustler

Remote

- Designed 8+ in-app banner variants to drive user activation (going online) and job-acceptance rates among delivery partners
- Built urgency-based, earning-focused, and reactivation campaign frameworks; estimated 25–30% improvement in CTA engagement vs. control
- Experimented with CTA placement, wording, and visual hierarchy to optimize conversion for lapsed-user reactivation
- Developed seasonal campaign strategies for Vishu and Easter targeting new client acquisition

PROJECTS

TaxShield – GST Validation & Anomaly Detection System | *Python, Pandas, Scikit-learn*

2025

- Built an automated pipeline to validate 10,000+ simulated GST invoice records and detect financial anomalies with 91% precision
- Implemented Isolation Forest-based anomaly detection; tuned threshold to reduce false positive rate by ~18%
- Developed rule-based validation engine aligned with GST taxation workflows, flagging 340 suspicious transaction patterns
- Designed end-to-end data preprocessing pipeline for cleaning, structuring, and normalizing raw financial datasets

AI-Based Resume Screening System | *Python, Scikit-learn, TF-IDF, NLP*

2025

- Built an NLP pipeline that ranked 500+ resumes against job descriptions in under 4 seconds, replacing ~2 hours of manual review
- Implemented TF-IDF vectorization and cosine similarity to score candidate-JD relevance with measurable ranking consistency
- Developed similarity-based shortlisting algorithm achieving 87% agreement with manual recruiter rankings on test set
- Automated filtering pipeline reducing manual screening workload by an estimated 70%

LEADERSHIP & ACHIEVEMENTS

Master of Ceremonies

April 2026

AICTE Pre-Summit – IndiaAI Impact Summit 2026

National Level

- Led stage coordination for a national-level AI summit featuring researchers, innovators, and policy makers
- Managed live session flow, speaker transitions, and audience engagement for 200+ attendees
- Facilitated panel discussions on AI in Healthcare and emerging technology policy

CERTIFICATIONS

Introduction to Large Language Models (Ongoing)

Jan 2026 – Apr 2026

NPTEL – Indian Institute of Technology (IIT)

12-week Course

- Studying LLM architectures, transformer models, attention mechanisms, and prompt engineering

AI Internship Certification

June 2025

Agnirva

Structured Program

- Completed ML fundamentals covering supervised/unsupervised learning; implemented models in Python

Olam – Vibe Coding Workshop

Oct 2025

μLearn PRC

- Hands-on collaborative coding workshop focused on problem-solving, logical thinking, and code structuring

TECHNICAL SKILLS

Languages: Python, Java, C, SQL

Libraries & Frameworks: Scikit-learn, Pandas, NumPy, FastAPI (learning)

Tools: Git, GitHub, Firebase, VS Code

Web: HTML, CSS

Core Concepts: OOP, Data Structures & Algorithms, Data Preprocessing, Feature Engineering, Model Evaluation, REST APIs (learning)

DSA Practice: Solved 40+ problems on LeetCode (arrays, strings, hashmaps)
